

Instructions to Create Our Own Collage

Planning your artwork:

1. In pencil, very gently draw the shape outlines for where the important parts of your image will go, like the sun and the hills at the bottom.
2. Use really faint lines to show some of the lines coming out of the sun. Make sure they go in all different directions, and make sure you don't over-do it and put too many on!
3. Plan where your people are going to go at the bottom. Look how small they need to be compared to the rest of the picture!

Make your own version:

If you have coloured paper, you can make your own collage by cutting and sticking on the shapes that you need. Remember to use lots of layers and overlap different parts over the top of each other. You might want to draw your people on at the end, as they are a bit small to cut out!

If you don't have coloured paper, be creative! You could use pencils, crayons, paint or any other materials you have to shade in your picture 😊
