

There is more than one method to find the perimeter of a square.

# True

The perimeter of a square can be calculated:

$$4\text{cm} + 4\text{cm} + 4\text{cm} + 4\text{cm} = 16\text{cm}$$

$$4\text{cm} \times 4 = 16\text{cm}$$

$$8\text{cm} \times 2 = 16\text{cm}$$
