

Activity 1:

Question: If I roll a dice 30 times, how many times is each number rolled?

First create a tally chart similar to the one below.

Score	Tally	Total
1		
2		
3		
4		
5		
6		

Then roll the dice and tally each score. (If you do not have a dice at home you can make one using the template on the website)

After 30 rolls, total how many times each number was rolled in the tally chart.

Now present your data on a bar chart.

Activity 2:

Can you think of your own question to investigate? Write your question, record your data and then present it on a bar chart.
