

$$45 - 20 - 3 = 22$$

We can subtract from any two-digit number by subtracting tens then ones.

$$45 - 3 - 20 = 22$$

- What's the same and what's different about this calculation?
- Can you predict what will happen if we subtract the ones *then* the tens?
- Try this with your equipment.
- Now try these calculations and check whether it makes a difference what order you subtract the tens and ones in.

$$53 - 2 - 30$$

$$53 - 30 - 2$$

- Complete these calculations, thinking about when you need to partition. Write the partitioned numbers before you calculate. Think do you need to partition the minuend (the first number) when you subtract.

$$40 - 20 =$$

$$42 - 20 =$$

$$54 - 2 =$$

$$54 - 22 =$$

$$65 - 44 =$$

$$66 - 44 =$$

$$44 - 21 =$$

$$44 - 22 =$$

$$44 - 23 =$$

$$52 - 11 =$$

$$68 - 15 =$$

$$66 - 22 =$$
